Special Needs: *Please contact me privately to discuss your specific needs if you believe you need course accommodations based on the impact of a disability, medical condition, or if you have emergency medical information to share. I will need a copy of the accommodation letter from Student Disability Services in order to arrange your class accommodations. Contact Student Disability Services, room 241, Copernicus Hall if you are not already registered with them. Student Disability Services maintains the confidential documentation of your disability and assists you in coordinating reasonable accommodations with your faculty.*

Course Description: Applications of statistical methods used for real life problems will be illustrated. The development of analytic skills in inferential, descriptive and exploratory statistics is enhanced by using of MS Excel. Chapters 9, 10, 11, 12, and 14 of the textbook will be covered. Few sections of Chapter 13 will also be mentioned if time is permitted.

Course Objective: The main objective of the course is to provide the student with an understanding of the concepts and techniques of general statistical methods used in real life today. A thorough understanding of the collection, presentation, analysis, and interpretation of business data is accomplished through the development of formal analytic skills for recognizing and formulating statistical problems in real life decision making.

Attendance Policy: All students are expected to attend and participate in all class sessions. Students are responsible for all reading material assigned during the course of the semester, the content of the text and lectures, all assignments, and all materials distributed during the class sessions whether you are in attendance or not. In the event of a weather emergency which requires curtailment or cancellation of classes, listen to WTIC (1080 AM) or call (860) 832-3333 for the “general snow message.”

Withdrawal Policy: After October 25, 2010, withdrawals are allowed only under extenuating circumstances and require approval of the course instructor, department chair, and dean of the School of Arts and Sciences.

A student's semester grade is based upon the following points:

Computer Assignments	60 points
Quizzes (4 best quiz grades)	100 points
Exams	300 points
Final Examination	150 points
<hr/>	
Total	610 points
